

NGUZO AFRICA

OPERATIONS MANUAL • HQ ADMIN

Running the platform.

The control manual for Nguzo administrators — overseeing jobs, verifying permits, confirming escrow, approving execution, managing the Ground Force, and reconciling the ledger.

INTERNAL • HQ ADMINISTRATORS ONLY

CONTENTS

What's inside

01	Your mandate	Custodian of the gate
02	Overview	Reading the operations dashboard
03	Jobs & the gate	Driving contracts forward
04	Verify permits	The compliance check
05	Confirm payment	Escrow funding & release
06	Ground Force & Team	People & access
07	Ledger & settlement	Money, fees & invoices

YOUR POSITION

You are the only role that confirms money and releases execution. Three of the eleven gate steps are yours. Discipline here is the platform's reputation.

01 • YOUR MANDATE

Custodian of the gate

Admins don't buy, sell or transport. You orchestrate — verifying that each party did their part before the next step unlocks, and that money only moves when the work is real.

Verify permits

Confirm the client's route permits are valid before payment.

Confirm escrow

Confirm the client's TT proof so funds are recognized as secured.

Approve execution

Give the final go that releases the supplier to work.

Manage people

Control roles and access for the Ground Force and team.

ACCESS IS PRIVILEGED

Admin and field roles are internal-only and never self-assignable. Only an existing admin (or the env allowlist super-admins) can grant them.

02 • OVERVIEW

Reading the dashboard

The **Overview** is your situational picture — what's live, what's waiting on you, and where the money is.

1

Active jobs & stages

See every tender and the stage it sits at, so you can spot what's blocked on an admin action.

2

Pending actions

Permits awaiting verification, TT proofs awaiting confirmation, and contracts ready for execution approval.

3

Ground Force status

Who is inspecting and where liaison agents are deployed.

4

Ledger snapshot

Escrow held, fees earned and settlements run.

THREE CORRIDORS, ONE DESK

Southern · Central · Northern

03 • JOBS & THE GATE

Driving contracts forward

Open **Jobs** to act on any contract. The gate is strict — you can only advance the current step, and only when its condition is met.

Your three steps

FROM STAGE	YOUR ACTION	TO STAGE
Permits uploaded	Verify the client's permits	Permits verified
Payment proof uploaded	Confirm the escrow funding	Escrow confirmed
Escrow confirmed	Approve to execute	Executing

NEVER SKIP

If a step's condition isn't met, the advance is rejected by the system. Don't work around it — chase the responsible party instead.

04 • VERIFY PERMITS

The compliance check

Before any money is recognized, confirm the client has the legal right to run the route. The system seeds the correct checklist by route type.

ROUTE	REQUIRED PERMITS
Domestic	TARURA Heavy Load Permit · Municipal Clearance
Cross-border	TRA TANSAD · TBS Clearance · Phytosanitary Certificate · Origin OSBP entry · Destination OSBP entry

1

Open the uploaded permits

Review each document the client submitted against the seeded checklist.

2

Verify or reject

If complete and valid, mark permits verified to unlock the payment step. If not, leave it closed and notify the client to re-submit.

STAGE: PERMITS VERIFIED

MANUAL BY DESIGN

Auto-fetch from regulatory portals comes later. For now you inspect uploaded documents — Hugo's ground-zero safety discipline.

05 • CONFIRM PAYMENT

Escrow funding & release

1

Review the TT proof

The client uploads a telegraphic-transfer proof for the contract value. Match the amount and reference.

STAGE: PAYMENT UPLOADED

2

Confirm the escrow

Confirming marks the funds as secured in Nguzo's facility. The UI previews this as a protected escrow – **funds tracked, not held loosely**.

STAGE: ESCROW CONFIRMED

3

Approve to execute

With escrow confirmed, give the final approval. The supplier and field agent are notified and work begins.

STAGE: EXECUTING

MONEY FRAMING

Until a licensed escrow partner is integrated, funds are tracked in Nguzo's own account and presented as escrow. Keep the "tracked, not held" language consistent everywhere.

06 • GROUND FORCE & TEAM

People & access

Ground Force

Assign and monitor field inspectors and border liaison agents. Review their yard audits and border logs – this is your visibility into the physical moat.

Team & Access

The **Team** screen lists every user with a role dropdown. Hard rules enforced by the system:

- ✓ Public signup only offers **Client** and **Supplier**.
- ✓ Admin and field are **internal-only** – granted here, never self-assigned.
- ✓ You **cannot demote yourself**, and allowlisted super-admins are locked.
- ✓ Promoting a client/supplier to admin or field is logged.

SECURITY

Super-admins are set by the secret ADMIN_EMAILS allowlist and auto-promoted on login. They can't be demoted from the UI.

07 • LEDGER & SETTLEMENT

Money, fees & invoices

On client sign-off, the settlement engine runs automatically. Your job is to reconcile and disburse against its output.

SETTLEMENT FORMULA

Supplier payout = **Gross escrow** – **Nguzo 7% service fee** – **emergency parts credit used**. Itemized invoices are auto-generated for both client and supplier.

LEDGER LINE	CLIENT VIEW	SUPPLIER VIEW
Escrow funded	Total in	Gross on contract
Service fee (7%)	–	–
Parts credit used	–	–
Net to supplier	disbursed	final payout

1

Reconcile

Confirm the engine's figures against the funded escrow and any parts credit drawn.

2

Disburse & close

Release the net payout to the supplier and mark the contract completed. Notifications log to both parties.

STAGE: COMPLETED
