

PROCUREMENT PLATFORM

Operating Guide

How cargo transport and machinery rental move through Nguzo Africa — from posting a job to execution, secured at every step.

One job. Ten gated steps. No shortcuts.

Every job on Nguzo moves through a strict, ordered gate. Each step must be completed before the next unlocks — so a deal can never skip verification, permits, or payment. This is the trust layer made literal.

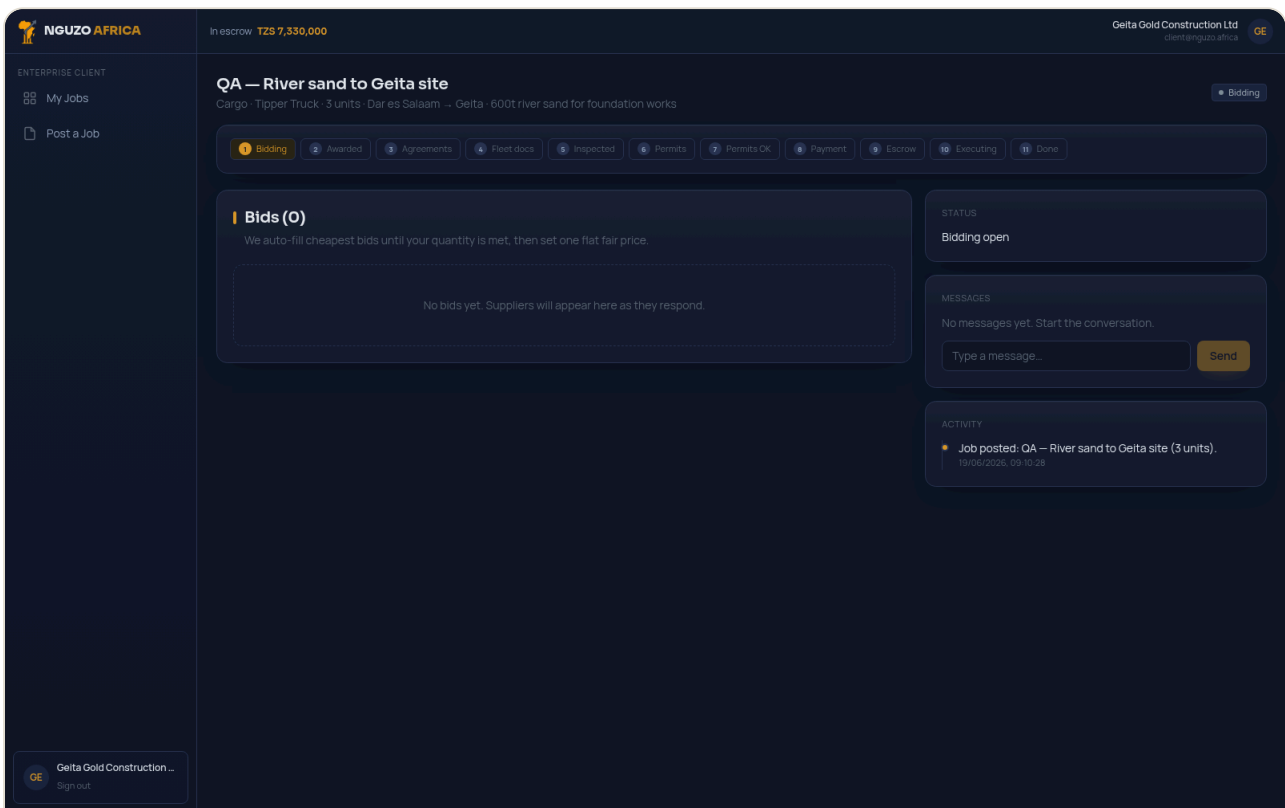

#	STAGE	WHO ACTS	WHAT HAPPENS
1	Bidding open	Supplier	Client posts a job (quantity + type + cargo/project). Suppliers bid partial or full quantity at their price.
2	Award confirmed	Client	System auto-fills the cheapest bids until the quantity is met, sets one flat fair price, client confirms. One contract per awarded supplier.
3	Agreements signed	Supplier	Each awarded supplier downloads their contract of agreement, signs it, and re-uploads the signed copy.
4	Machine docs uploaded	Supplier	Supplier uploads fleet / machine documents — registration, inspection certificates, insurance.
5	Field verified	Field agent	Nguzo field agent reviews documents and inspects the assets on the ground, then verifies.
6	Permits uploaded	Client	Client uploads the required transport / project permits for the route.
7	Permits verified	Nguzo admin	Admin checks the uploaded permits are valid and releases the next step.
8	Payment proof uploaded	Client	Client uploads the TT payment proof. This is the escrow funding step — funds are recorded as held by Nguzo.
9	Escrow confirmed	Nguzo admin	Admin confirms the payment is received. Escrow is recorded as held by Nguzo.
10	Approved — executing	Nguzo admin	Admin gives the final authorisation. Supplier and field force begin execution.

Why the gate matters. Most marketplaces are passive — they match and step away. Nguzo holds the deal together: collateralized escrow, boots-on-the-ground inspection, and a strict approval order mean no party is exposed. Funds are tracked and held by Nguzo until execution is authorised.

For Clients

You need trucks or machinery. You post what you need, watch verified suppliers bid, confirm the award, and fund the job through escrow — all in one place.

- 1 From **My Jobs**, click **Post a Job**. Choose cargo transport or machinery rental, pick the exact type, describe the cargo or project, and set how many units you need.
- 2 Suppliers bid partial or full quantity. You watch bids land in real time on the job page.
- 3 Click **Confirm award**. Nguzo auto-fills the cheapest bids to your quantity and sets one flat fair price — every awarded supplier settles at the same rate.
- 4 Once suppliers sign and pass field inspection, you upload your **permits**, then your **TT payment proof**. Your payment is held in escrow by Nguzo until execution is approved.

Uploading payment proof to fund escrow

For Suppliers

You own trucks or machinery. You find open jobs, bid the quantity you can supply, sign your agreement, and prove your fleet — with guaranteed payment waiting in escrow.

- 1 On the **Jobs** board, open any tender in **Bidding**. Enter the units you can supply and your price per unit, then submit your bid.
- 2 If awarded, go to **My Awards**. Download your contract of agreement, sign it, and upload the signed copy.
- 3 Upload your **machine / fleet documents** — registration, inspection certificates, insurance — for the Nguzo field agent to verify.
- 4 Once you're verified, your part is done. The job moves through permits and payment, and you're paid from escrow on execution.

The screenshot displays the Nguzo Africa platform interface. At the top, the 'Awarded pipeline' is shown as TZS 16,030,000. The user is logged in as 'Tanzanite Heavy Fleet Co.' with a 'TA' role. The left sidebar shows navigation options: Jobs, Fleet, Escrow Vault, and Report Breakdown. The main content area is titled 'QA — River sand to Geita site' and shows a 'Tipper Truck : 3 units : Dar es Salaam -> Geita : 600T river sand for foundation works'. A progress bar at the top of the main area indicates the current stage is 'Bidding'. Below the progress bar, there is a 'Place your bid' section with a note: 'Offer partial or full quantity. We auto-fill the cheapest bids to a flat fair price.' The 'Place your bid' section includes input fields for 'UNITS YOU CAN SUPPLY' (set to 1) and 'PRICE PER UNIT (TZS)' (empty), with an 'Update bid' button. A 'NOTE (OPTIONAL)' field contains the text 'Availability, yard, conditions...'. Below this, it states 'Your current bid: 2 unit(s) @ TZS 500,000 each - Open'. On the right side, there is a 'MESSAGES' section with a 'Type a message...' input and a 'Send' button. Below the messages is an 'ACTIVITY' section showing a list of recent activities: 'Kilimanjaro Plant Hire bid 2 unit(s) @ TZS 540,000 each.' (19/06/2026, 09:10:32), 'Tanzanite Heavy Fleet Co. bid 2 unit(s) @ TZS 500,000 each.' (19/06/2026, 09:10:32), and 'Job posted: QA — River sand to Geita site (3 units).' (19/06/2026, 09:10:28).

For Field Agents

You are Nguzo's eyes on the ground. You review supplier documents and physically inspect the assets before any job is allowed to proceed.

- 1 Open **Inspections** to see jobs waiting for verification once suppliers have uploaded their fleet documents.
- 2 Open a job to review the uploaded machine / fleet documents against the assets.
- 3 Inspect on site, then **verify**. This unlocks the permit stage – no job advances without your sign-off.

Field Inspections
Jobs whose suppliers have uploaded fleet docs and are awaiting your on-site verification.

Reviewing documents and verifying on the ground

For Nguzo Admin

You hold the final gates. You verify permits, confirm escrow funding, and give the authorisation that lets a job execute.

- 1 From **Jobs**, open a tender at the permit stage. Review the client's uploaded permits and **verify** them.
- 2 When the client uploads TT proof, **confirm payment received**. Escrow is recorded as held by Nguzo.
- 3 Give the final **Approve to execute**. The supplier and field force are authorised to begin. Track every action in the activity log.

The screenshot displays the Nguzo Africa Admin interface. On the left is a sidebar with navigation options: Overview, Jobs (selected), Ground Force, Verification, Team, Notifications, and Ledger. The main content area is titled 'Jobs' and includes a sub-header 'Every job across the corridor. Action the steps Nguzo controls — verify permits, confirm payment, approve execution.' Below this, a summary bar indicates '2 jobs awaiting your action.' The main list shows several job entries, each with a title, client information, and a progress bar of steps. The steps are: Bidding, Awarded, Agreements, Fleet docs, Inspected, Permits, Permits OK, Payment, Escrow, Executing, and Done. The 'Permits' step is highlighted in orange for the first two jobs, indicating they are currently being reviewed. The first job is 'QA — River sand to Geita site' by Geita Gold Construction Ltd. The second job is 'Wheel Loader x4 — Dar — Dodoma' by Geita Gold Construction Ltd. The third job is also 'Wheel Loader x4 — Dar — Dodoma' by Geita Gold Construction Ltd. The fourth job is 'Wheel Loader x4 — Dar — Dodoma' by Geita Gold Construction Ltd. The fifth job is 'Wheel Loader x4 — Dar — Dodoma' by Geita Gold Construction Ltd. The sixth job is 'Wheel Loader x4 — Dar — Dodoma' by Geita Gold Construction Ltd. The seventh job is 'Wheel Loader x4 — Dar — Dodoma' by Geita Gold Construction Ltd. The eighth job is 'Wheel Loader x4 — Dar — Dodoma' by Geita Gold Construction Ltd. The bottom of the interface shows the user 'Nguzo HQ' with a 'Sign out' button.

Escrow confirmed, job approved and executing

The gate is the moat.

Africa doesn't have a payment problem — it has a trust problem. Passive marketplaces failed because matching alone doesn't make strangers transact on high-value, cross-border deals. Nguzo's defensibility is in three things competitors can't copy by writing code:

01

Collateralized escrow

Project capital is locked and tracked by Nguzo, then auto-split on sign-off. Suppliers know payment is secured before they move an asset.

02

Boots on the ground

Field inspectors physically verify assets and border liaison agents resolve corridor stalls. A passive app cannot stand at Tunduma.

03

A strict, un-skipable gate

Ten ordered steps mean no deal proceeds without verification, permits, and confirmed funds. Risk is structurally removed, not promised.

What you just saw is live. Every screenshot in this guide is the working platform — a real job posted, bid, awarded at a flat fair price, inspected, permitted, funded into escrow, and approved to execute. The flywheel runs today.
